«action»
<LA-SC-01> Maintain EPS Evidence Chain Logical Activity
doc
Realizes F-01. Inputs and outputs retain the F-01 signature. A failed transfer, unavailable record, rejected artifact, or invalid chain is routed through workflow control to an explicit assessment and retained discrepancy. No path replaces the prior controlled evidence baseline without acceptance.
attributes
evidenceOutcomeAccepted : Boolean
request : 'Evidence Chain Request'
modelRecords : 'Controlled Model Records'
evidenceRecords : 'Retained Evidence Records'
«action»
Receive evidence-chain request through IF-01
«action»
Verify model and evidence transfers
«action»
Resolve evidence baseline and source revisions
«action»
Scope designated evidence chain : 'Scope Evidence Chain'
