«action»
«LA-SC-03» Reproduce Designated Analysis Logical Activity
doc
Realizes F-03. The review boundary receives the verdict while the analysis-execution boundary carries the controlled request and correlated raw result. The shared coordinator accepts neither an altered baseline nor an uncorrelated result.
attributes
reproductionSuccessful : Boolean
request : 'Reproduction Request'
modelRecords : 'Controlled Model Records'
evidenceRecords : 'Retained Evidence Records'
returnedResult : 'Analysis Result Package'
executionRequest : 'Analysis Execution Request'
result : 'Analysis Result Package'
verdict : 'Reproduction Verdict'
«action»
Receive reproduction request through IF-03
«action»
Resolve designated baseline and tolerance
«action»
Prepare reproduction package : 'Prepare Reproduction Package'
«action»
Verify reproduction-package transfers
«action»
Submit controlled execution through IF-05
«action»
Receive correlated analysis result through IF-05
«action»
Coordinate controlled analysis : 'Coordinate Controlled Analysis'
«action»
Evaluate reproduced result : 'Evaluate Reproduced Result'
«action»
Record reproduction discrepancy
«action»
Authorize reproduction verdict
«action»
Issue reproduction verdict : 'Issue Reproduction Verdict'
«action»
Record reproduction measurement
«action»
Retain reproduction evidence
«action»
Publish verdict through IF-03
Reproduction successful?
