«action»
«LA-SC-04» Assess Controlled Design Change Logical Activity
doc
Realizes F-04. The target remains immutable. A passing outcome identifies a distinct successor baseline. A failed assessment retains the impact, status, and discrepancies without registering a replacement source revision.
attributes
changeCorrect : Boolean
request : 'Design Change Request'
modelRecords : 'Controlled Model Records'
evidenceRecords : 'Retained Evidence Records'
revisions : 'Change Revision Package'
returnedResult : 'Analysis Result Package'
executionRequest : 'Analysis Execution Request'
impact : 'Change Impact Assessment'
evidencePackage : 'Change Evidence Package'
«action»
Receive change request and revisions through IF-01
«action»
Verify controlled change transfers
«action»
Resolve immutable target baseline
«action»
Validate change request : 'Validate Change Request'
«action»
Analyze change impact : 'Analyze Change Impact'
«action»
Coordinate controlled analysis : 'Coordinate Controlled Analysis'
«action»
Validate regenerated evidence : 'Validate Regenerated Evidence'
«action»
Assemble change evidence package : 'Assemble Change Evidence Package'
«action»
Register accepted revision through IF-04
«action»
Record change measurement
«action»
Retain change evidence
«action»
Publish change outcome through IF-01
«action»
Submit affected execution through IF-05
«action»
Receive affected analysis result through IF-05
«action»
Record unresolved change discrepancy
«action»
Authorize successor baseline
