«action»
«LA-SC-05» Compare Candidate EPS Architectures Logical Activity

doc

Realizes F-05. The logical activity retains the declared common comparison basis, feasibility gate, raw results, Pareto relations, score, sensitivity, uncertainty, and discrepancies. It does not choose an EPS candidate or an analysis product.

attributes

comparisonBasisAccepted : Boolean

request : 'Candidate Comparison Request'

protocol : 'Comparison Protocol'

candidates : 'Candidate Model Package'

returnedResults : 'Analysis Result Package'

sensitivityAndUncertainty : 'Sensitivity and Uncertainty Assessment'

executionRequest : 'Analysis Execution Request'

result : 'Analysis Result Package'

comparisonPackage : 'Candidate Comparison Package'

«action»
Receive candidate-comparison request through IF-01

«action»
Receive comparison protocol through IF-02

«action»
Verify candidate-model transfers

«action»
Resolve candidate and comparison baselines

«action»
Validate comparison basis : 'Validate Comparison Basis'

*request

*protocol

*candidates

*executionRequest

*assessment

«flow»
of Comparison Basis Assessment

«flow»
of Analysis Execution Request

Comparison basis accepted?

«action»
Submit common execution through IF-05

«action»
Receive candidate results through IF-05

«action»
Coordinate controlled analysis : 'Coordinate Controlled Analysis'

*preparedRequest

*returnedResult

*submittedRequest

*acceptedResult

«flow»
of Analysis Result Package

«flow»
of Analysis Result Package

«action»
Determine candidate feasibility : 'Determine Candidate Feasibility'

*protocol

*results

*feasibility

«flow»
of Candidate Feasibility Assessment

«flow»
of Candidate Feasibility Assessment

«action»
Compare feasible candidates : 'Compare Candidate Architectures'

*protocol

*results

*feasibility

*comparison

«flow»
of Candidate Comparison Assessment

«action»
Receive sensitivity and uncertainty through IF-02

«action»
Record comparison-basis discrepancy

Comparison outcome determined

«action»
Issue candidate comparison : 'Issue Candidate Comparison'

*basisAssessment

*protocol

*results

*feasibility

*comparison

*sensitivityAndUncertainty

*comparisonPackage

«action»
Record comparison measurement

«action»
Retain candidate comparison

«action»
Publish candidate comparison through IF-01
