Model maturity × EPS relevance / controlled co-reporting

n=40 reports; model maturity is multi-label and EPS relevance is a controlled category.

EPS relevance	Model maturity: Conceptual framework	Reference model / template	Prototype demonstration	Executable model	Project-applied model	Validated / operational model
system-level only	3	1	3	1	1	0
EPS-specific	0	1	2	1	0	0
power-budget/electrical-architecture	8	10	17	13	12	0
EPS-adjacent	6	9	11	2	4	0
not EPS-relevant	1	1	2	0	1	0

Cells are unique-report co-reporting counts; × means cross-classification only / no progression or direct linkage. All QA, unassigned, and not-reported classes are zero and remain in the CSV.
