(a) Battery class (selected lines)

```
class Battery(EPSComponent):
    rated_energy = Property(
        "self.cell_count.value * "
        "self.cell_rated_energy.value", "Wh")
    bol_energy = Property(
        "self.rated_energy.value * 3600", "J")
```

(b) Interactive Python

```
>>> from framework.models import (
...     Mission, CubeSatBus)
>>> mission = Mission()
>>> bus = mission.add(CubeSatBus("BUS"))
>>> battery = bus.EPS.Battery
>>> battery.rated_energy = 20.35
>>> battery.rated_energy.value
20.35
>>> battery.bol_energy.value
73260.0
```
