«part def»

<LCS-00> Logical Component Specification Set

doc

One representative occurrence of every specified logical component for navigation and rendering. LA-01 remains the authoritative composition and connector architecture.

«part»

transferAssuranceManager : 'Specified Transfer Assurance Manager'

ports

^interfaceManagers : 'Logical Transfer Assurance Port'

actions

^verifyBoundaryTransfer
^preserveRejectedTransferRecord

«part»

modelControlInterface : 'Specified Model Control Interface Manager'

ports

^boundary : 'Model Control Port'
^services : 'Model Control Port'
^assurance : 'Logical Transfer Assurance Port'

actions

^receiveControlledModelRecords
^publishControlledModelUpdates

«part»

controlledAnalysisCoordinator : 'Specified Controlled Analysis Coordinator'

ports

^analysisExecution : 'Analysis Execution Port'
^reproduction : 'Analysis Execution Port'
^designChange : 'Analysis Execution Port'
^candidateEvaluation : 'Analysis Execution Port'

actions

^coordinateControlledAnalysis : 'Coordinate Controlled Analysis'

«part»

evidenceCustodyInterface : 'Specified Evidence Custody Interface Manager'

ports

^boundary : 'Evidence Custody Port'
^services : 'Evidence Custody Port'
^assurance : 'Logical Transfer Assurance Port'

actions

^retrieveRetainedEvidenceRecords
^submitControlledEvidenceRecords

«part»

analysisExecutionInterface : 'Specified Analysis Execution Interface Manager'

ports

^boundary : 'Analysis Execution Port'
^services : 'Analysis Execution Port'
^assurance : 'Logical Transfer Assurance Port'

actions

^submitAnalysisExecutionRequest
^receiveAnalysisExecutionResult

«part»

missionApplicationInterface : 'Specified Mission Application Interface Manager'

ports

^boundary : 'Mission Application Port'
^services : 'Mission Application Port'
^assurance : 'Logical Transfer Assurance Port'

actions

^receiveMissionApplicationRequests
^publishMissionApplicationOutcomes

«part»

independentReviewInterface : 'Specified Independent Review Interface Manager'

ports

^boundary : 'Independent Review Port'
^services : 'Independent Review Port'
^assurance : 'Logical Transfer Assurance Port'

actions

^receiveIndependentReviewInputs
^publishIndependentReviewOutputs

«part»

researchGovernanceInterface : 'Specified Research Governance Interface Manager'

ports

^boundary : 'Research Governance Port'
^services : 'Research Governance Port'
^assurance : 'Logical Transfer Assurance Port'

actions

^receiveResearchGovernanceInputs
^publishResearchGovernanceOutputs

«part»

workflowControlManager : 'Specified Workflow Control Manager'

items

^workflowStateStore : 'Logical Workflow State Store'

ports

^services : 'Logical Workflow Control Port'

actions

^establishControlledContext
^dispatchVerifiedRequest
^applyTerminalOutcomeGuard
^recordExceptionalOutcome
^controlRecovery
^preserveContextAndBaseline

«part»

caseConfigurationManager : 'Specified Case Configuration Manager'

ports

^missionApplication : 'Mission Application Port'
^researchGovernance : 'Research Governance Port'
^modelControl : 'Model Control Port'
^baselineControl : 'Logical Baseline Control Port'
^evidenceManagement : 'Logical Evidence Management Port'
^workflowControl : 'Logical Workflow Control Port'
^measurement : 'Logical Measurement Port'

actions

^captureCaseConfiguration : 'Capture Case Configuration'
^validateCaseConfiguration : 'Validate Case Configuration'
^issueConfigurationStatus : 'Issue Configuration Status'

«part»

evidenceChainManager : 'Specified Evidence Chain Manager'

ports

^missionApplication : 'Mission Application Port'
^modelControl : 'Model Control Port'
^baselineControl : 'Logical Baseline Control Port'
^evidenceManagement : 'Logical Evidence Management Port'
^workflowControl : 'Logical Workflow Control Port'
^measurement : 'Logical Measurement Port'

actions

^registerExternalArtifacts : 'Register External Engineering Artifacts'
^scopeEvidenceChain : 'Scope Evidence Chain'
^validateEvidenceChain : 'Validate Evidence Chain'
^issueEvidenceChainAssessment : 'Issue Evidence Chain Assessment'

«part»

baselineAndConfigurationManager : 'Specified Baseline and Configuration Manager'

items

^configurationStore : 'Logical Baseline and Configuration Store'

ports

^services : 'Logical Baseline Control Port'

actions

^controlCaseConfiguration
^preserveBaselineIdentity
^declareExecutionEnvironment
^assembleReconstructionDeclaration

«part»

designReviewManager : 'Specified Design Review Manager'

ports

^missionApplication : 'Mission Application Port'
^independentReview : 'Independent Review Port'
^selectedReproduction : 'Independent Review Port'
^baselineControl : 'Logical Baseline Control Port'
^evidenceManagement : 'Logical Evidence Management Port'
^workflowControl : 'Logical Workflow Control Port'
^measurement : 'Logical Measurement Port'

actions

^assembleReviewPackage : 'Assemble Review Package'
^coordinateSelectedReproduction : 'Coordinate Selected Reproduction'
^manageReviewFindings : 'Manage Review Findings'
^issueReviewStatus : 'Issue Review Status'

«part»

analysisReproductionManager : 'Specified Analysis Reproduction Manager'

ports

^independentReview : 'Independent Review Port'
^controlledAnalysis : 'Analysis Execution Port'
^selectedReviewReproduction : 'Independent Review Port'
^baselineControl : 'Logical Baseline Control Port'
^evidenceManagement : 'Logical Evidence Management Port'
^workflowControl : 'Logical Workflow Control Port'
^measurement : 'Logical Measurement Port'

actions

^prepareReproductionPackage : 'Prepare Reproduction Package'
^evaluateReproducedResult : 'Evaluate Reproduced Result'
^issueReproductionVerdict : 'Issue Reproduction Verdict'

«part»

evidenceAndProvenanceManager : 'Specified Evidence and Provenance Manager'

items

^evidenceStore : 'Logical Evidence and Provenance Store'

ports

^services : 'Logical Evidence Management Port'
^custody : 'Evidence Custody Port'

actions

^retainControlledRecords
^preserveOutputProvenance
^retainDecisionTransparency
^supplyReconstructionEvidence

«part»

candidateEvaluationManager : 'Specified Candidate Evaluation Manager'

ports

^missionApplication : 'Mission Application Port'
^researchGovernance : 'Research Governance Port'
^modelControl : 'Model Control Port'
^controlledAnalysis : 'Analysis Execution Port'
^baselineControl : 'Logical Baseline Control Port'
^evidenceManagement : 'Logical Evidence Management Port'
^workflowControl : 'Logical Workflow Control Port'
^measurement : 'Logical Measurement Port'

actions

^validateComparisonBasis : 'Validate Comparison Basis'
^determineCandidateFeasibility : 'Determine Candidate Feasibility'
^compareCandidateArchitectures : 'Compare Candidate Architectures'
^issueCandidateComparison : 'Issue Candidate Comparison'

«part»

designChangeAssessmentManager : 'Specified Design Change Assessment Manager'

ports

^missionApplication : 'Mission Application Port'
^modelControl : 'Model Control Port'
^controlledAnalysis : 'Analysis Execution Port'
^baselineControl : 'Logical Baseline Control Port'
^evidenceManagement : 'Logical Evidence Management Port'
^workflowControl : 'Logical Workflow Control Port'
^measurement : 'Logical Measurement Port'

actions

^validateChangeRequest : 'Validate Change Request'
^analyzeChangeImpact : 'Analyze Change Impact'
^validateRegeneratedEvidence : 'Validate Regenerated Evidence'
^assembleChangeEvidencePackage : 'Assemble Change Evidence Package'

«part»

evaluationMeasurementManager : 'Specified Evaluation Measurement Manager'

items

^measurementStore : 'Logical Measurement Store'

ports

^services : 'Logical Measurement Port'

actions

^recordTraceCoverage
^recordReproductionSuccess
^recordCriticalDiscrepancyStatus
^recordCompletedCaseCount
