<GY-PN-01> Browser Client Physical Node

doc

Participant-side node. It contains the only client resources established by the lightweight web design.

«part»
host : 'Participant Browser Host'

«part»
browser : 'Modern Web Browser'

<GY-PN-02> Git and YAML Engineering Data Service Physical Node

doc

Combines the lightweight web service design with the demonstrated Git and YAML docs-as-code record and generation workflow. Exact local or cloud deployment remains open.

«part»
restAPI : 'Engineering Data REST API'

«part»

<GY-PN-03> Model and Analysis Integration Runner Physical Node

doc

Separates tool-specific adapters and assurance behavior from the lightweight engineering data service. This limits the effect of model, analysis, repository, and schema changes.

«part»
host : 'Integration Runner Host'

«part»
evaluationRunner : 'Evaluation Manifest Runner'
