07 EPS configuration and physical estimates

07.1 FR-15
Configure EPS design representation

Parameters, component variants, extensions, interfaces and requirement allocations

07.2 FR-13
Identify sourced aggregate / component data

Mass, dimensions, quantities, units and sources; aggregation assumptions and uncertainty

07.3 FR-13
Calculate mass, volume and stack height

Revision-linked mass, occupied volume and stack-height estimates; applicable allocations

07.4 FR-13
Assess allocation margins

Allocation findings

Engineer
Consider design findings

Margins, uncertainty, assumptions, sources and explicit unknown quantities

07.5 FR-13
Retain estimates and unknown values
