<DC-00> Project-Imposed Framework Design Constraints

doc

The implemented framework conforms to the technology and configuration-control choices imposed by the project technical baseline. DC-01 and DC-02 are design constraints rather than stakeholder-derived performance requirements.

subject

framework : 'Nanosatellite EPS Engineering Framework'

require constraints

docThe implementation satisfies every retained project-imposed design constraint.
statement { }

«requirement»

<FUN-00> Functional Requirements

doc

The framework shall perform every required black-box service function.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docFUN-01 through FUN-22 are satisfied.
statement { }

«#Refinement»

«requirement»

<INT-00> Interface Requirements

doc

The framework shall conform to every required typed boundary contract.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docINT-01 through INT-08 are satisfied.
statement { }

«#Refinement»

«requirement»

<STO-00> Store Requirements

doc

The framework shall preserve and retrieve the required controlled records.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docSTO-01 through STO-04 are satisfied.
statement { }

«#Refinement»

«requirement»

<PER-00> Performance and Measurement Requirements

doc

The framework shall meet acceptance targets and report every comparative MOP.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docPER-01 through PER-11 are satisfied.
statement { }

«#Refinement»

«requirement»

<QLT-00> Quality Requirements

doc

Framework outputs shall preserve integrity, transparency, and explicit status.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docQLT-01 through QLT-05 are satisfied.
statement { }

«#Refinement»

«requirement»

<RES-00> Execution Resource Requirements

doc

The framework shall declare and support reconstruction of its execution environment.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docRES-01 and RES-02 are satisfied.
statement { }

«#Refinement»

«requirement»

<SYS-00> Framework Black-Box System Requirements

doc

Every candidate framework realization shall satisfy all functional, interface, store, performance, quality, resource-declaration, and project-imposed design requirements in this specification.

subject

framework : 'Specified Nanosatellite EPS Engineering Framework'

require constraints

docEvery mandatory leaf requirement has a passing verification verdict.
statement { }
