Claimed outcomes: deterministic categories
Openness, accessibility, or reproducibility
11
Documentation, configuration, or change management
15
Verification, validation, test, or compliance support
20
Reliability, mission success, quality, risk, or robustness
22
Simulation, trade-space, budget, or early analysis support
25
Traceability, consistency, or single source of truth
27
Reuse, templates, standardization, or replicability
27
Communication, collaboration, or stakeholder alignment
30
Integration, interoperability, or data exchange
32
Efficiency, automation, or reduced time/cost/effort
